

# PHILLIPS MEDISIZE ADDS VECTURA'S MARKET-LEADING INHALATION CAPABILITIES

Contributed to the success of 13 inhaled medicines that have helped over

**10** MILLION PATIENTS WORLDWIDE

**28** YEARS OF INHALATION INNOVATION

6,000 employees including

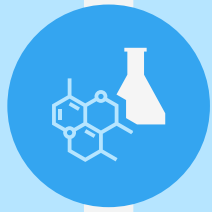

**1,200+** ENGINEERS & SCIENTISTS

**23** PRODUCTION FACILITIES serving customers across U.S., Europe and Asia

**60** YEARS OF INNOVATION **7** R&D CENTERS

Formulation of small and large molecules, biologics, complex combination products, novel and generic products

Pharmaceutical analysis

Device platforms

Nasal devices

Process development and technical transfer

Manufacturing of drug product and medical devices for development studies and clinical trials

Legal and regulatory services

Legal and regulatory services

Assembly, labeling and packaging  
180+ custom assembly lines

Scalable manufacturing and complex injection molding

- Dedicated NPI teams at each facility
- Manufacturing space 2.9M+ sq. ft. (269k+sq. m<sup>2</sup>)
- Class 7 & 8 clean rooms 500K+ sq. ft. (47k+sq. m<sup>2</sup>)

Metered Dose Inhalers (MDI)

Dry Powder Inhalers (DPI)

Nebulizers

Together, we can help pharmaceutical companies to develop and deliver innovative products that address the growing global demand for new therapies to treat chronic respiratory diseases like asthma and COPD, as well as for non-respiratory conditions.

**Bringing Possibilities to Life**
