

MED TECH

For over 60 years Phillips-Medisize, a Molex company, has helped leading companies develop and manufacture products for healthier, more productive lives.

CARDIOVASCULAR

DIABETES

DRUG INFUSION SYSTEMS

MEDICAL WEARABLES

SURGICAL ROBOTICS

TRANSFORM THE FUTURE OF HEALTHCARE WITH YOUR NEXT-GENERATION MEDICAL DEVICE

Phillips-Medisize offers unparalleled injection molding expertise, custom cable assembly, and the unique advantage of our integration with Molex, a global leader in connectivity. Product realization is inherently unpredictable, especially in the highly regulated medical device industry — we help ensure the performance, quality and reliability essential for your market success.

End-to-end medical contract manufacturing and design supports product development ranging from components to finished medical devices

Precision plastic, metal and magnesium injection molding and assembly delivers superior quality, speed, and repeatability

High performance medical interconnects with complex cable assemblies and custom connectors meet the most stringent medical applications

ISO 13485 quality management system ensures regulatory compliance across global markets

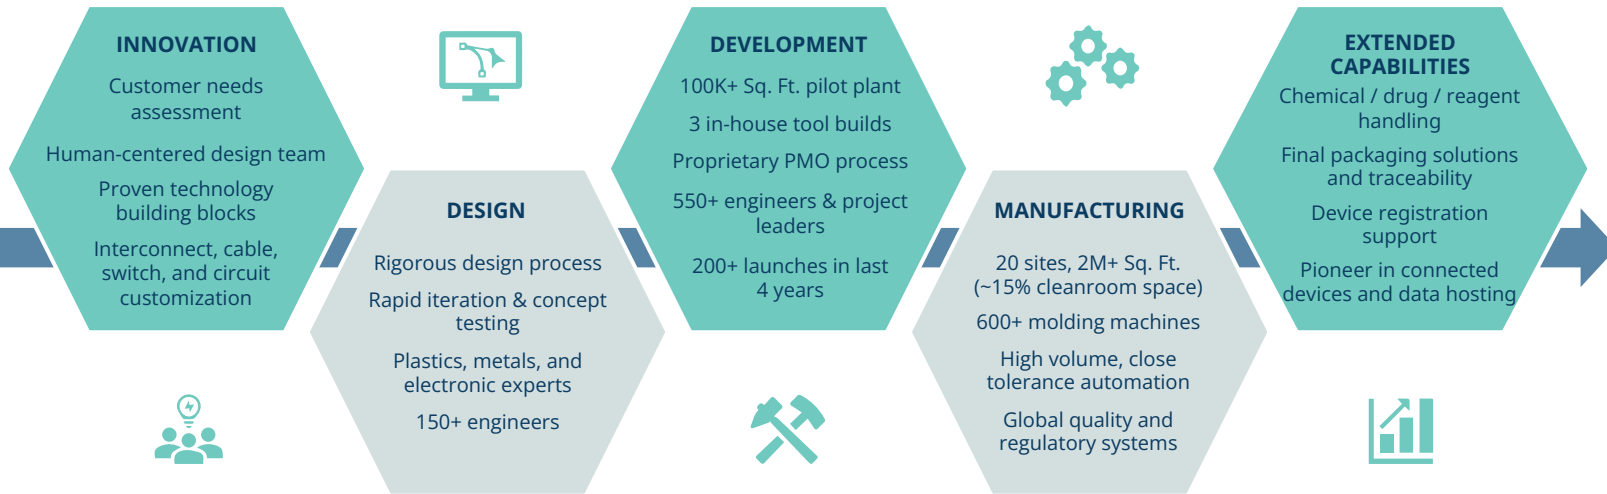

Controlled environments with certified and FDA-registered clean rooms and white rooms
